

PTFE LINED BALL VALVES

DIN

High Performance

The **heavy duty construction** meets the stringent requirements of chemical process industry.

Virtually **maintenance free** and give long time service due to their quality and simplicity of design.

Specially designed for **low torque, bubble tight shut-off** and **minimal pressure drop**.

Outstanding corrosion resistance and high degree of safety in various applications.

PTFE Properties

- **Very high inertia**, due to the presence of fluorine atoms, which, due to their compact structure, shield the carbon atoms of the polymer chain from potential chemical damages.
- It is **insoluble** in every solvent **under 300°C**.
- It has a wide range of working temperatures to a maximum temperature of 200°C.
- Extremely low adhesiveness, due to its reduced superficial tension
- Lowest friction coefficient amongst every other existing solid materials
- It is extremely hydrophobic and completely hydrolysis-proof (it is used as an anti-corrosive barrier and it can hold its characteristics even after years of being in contact with fluids).
- Chemically pure and inert
- Microbiologically resistant, it doesn't let bacteria and fungi proliferate
- Electrically insulating
- Non-flammable
- It holds up very well against atmospheric and environmental ageing, even when it faces high temperatures or when in contact with solvents, oils, oxidizing agents and UV rays.
- Good mechanical properties, especially when employed in presence of vibration or flexions.

Materials

Position	Description	DIN
1	Body 1	1.0619+PFA
2	Body 2	1.0619+PFA
3	Ball-stem	1.4470 + PFA
4	Seat	PTFE (Modified)
7	Stem packing	PTFE (Modified)
8	Gland packing	S.S 1.4401
9	Spring washer	S.S. AISI 301
11	Cover	S.S. 1.4401
13	Cover bolt	A4-70
16	Handle	A351 CF8M/WCC
17	Handle bolt	S.S. (316)/1.045(8.8)
22	Stop pin	S.S. AISI 316
41	Stud	A2-70
42	Nut	A2-70
165	Stem bearing	PTFE (modified)+FG
193	Packing Casing	PFA+AISI 316

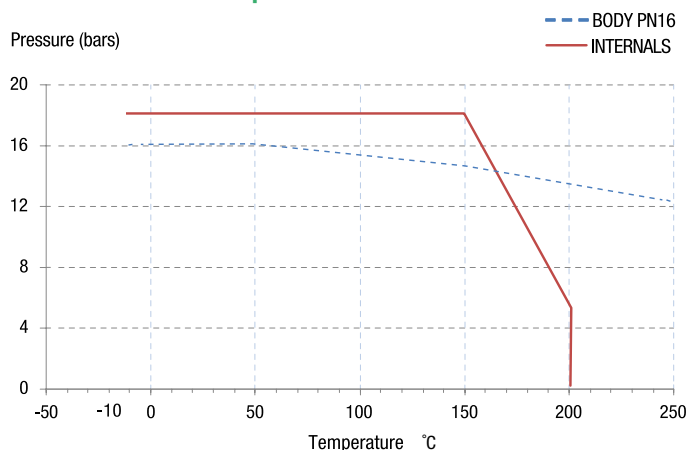

PFA thickness-minimum 3mm

**Depending on service conditions

*Torque values have been measured P at maximum rating at room temperature

*Dimensions are in mm. *Torque & MAST are in Nm * Weight in Kilograms

P+L Valves, Who we are.

P+L Valve is a new PTFE lined ball valve, as the result of the union of two major European manufacturers, **LMP Fluorocarbon**, a leading company specialized in the PTFE Lining field, and **Pekos Valves**, ball valve manufacturer with more than 30 years in the industry.
